DATA VISUALIZATION

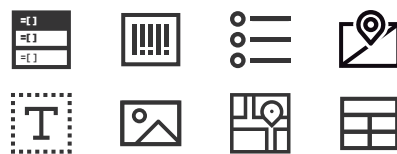

CHART TYPES

OFFER AD HOC REPORTING TO END USERS

Embed the customizable ProDesigner* component in your desktop or web solution, and give your users a tailored ad hoc report-creation experience

BRANCH OUT WITH MULTIPLE REPORT TYPES

Select from layout-driven page reports, data-driven RDL reports, and code-based section reports to create a full-featured report library

SAVE TIME

Create a master report* as a template to keep consistent branding in headers, footers, logos, and more

Utilize four different report designers to save development time. With each designer providing the same experience, you can build with ease

POWERFUL REPORTING ENGINE

ActiveReports' high-speed reporting engine is optimized for fast imports, exports, calculations, and extensive report generation

NO-CODE DESIGN WITH PRODESIGNER APP

Design and deliver reports quickly and easily with the desktop ProDesigner* app

EXPORT TO MULTIPLE FORMATS

Export to major modern document types like PDF, Excel, CSV, DocX, JSON, Word, RTF, HTML, Text, XML, and TIFF

*Not included in ActiveReports Standard
