

THE WORLD'S #1 SELLING JAVASCRIPT SPREADSHEET WITH OVER 500 EXCEL FUNCTIONS

Deliver true Excel-like
spreadsheet experiences, fast -
with zero dependencies
on Excel

*SpreadJS ribbon bar shown using the
optional Designer Component add-on.

DELIVER EXCEL-LIKE
EXPERIENCES, FAST,
WITH NO DEPENDENCIES

CREATE JAVASCRIPT
SPREADSHEETS, GRIDS,
DASHBOARDS, AND FORMS

PURE JAVASCRIPT CONTROLS
THAT SUPPORT ANGULAR,
REACT, AND VUE

ENHANCE JS APPS WITH
OPTIONAL ADD-ONS:
PIVOTTABLES, DESIGNER
TOOLBAR, AND GANTTSHEET

“We have been using Spread in our desktop and web products (PerpetualBudget) for over a decade. Not only are the Spread grids great controls but the support at GrapeCity [now known as MESCIUS] is the best. When you need them, they're there!”

SPREADJS**

CREATE FINANCIAL, ANALYSIS, BUDGETING, DASHBOARD, DATA COLLECTION AND MANAGEMENT, SCIENTIFIC, HEALTHCARE, EDUCATION AND MORE APPLICATIONS.

TOP FEATURES

A COMPLETE HIGH-PERFORMANCE JAVASCRIPT APP IN ONE SPREADSHEET CONTROL

Leverage the extensive JS spreadsheet API library and robust calculation engine to create analysis and budgeting documents, dashboards, data collection apps, and more

CODE-FREE EXTENSIBILITY AND CUSTOMIZATION WITH SPREAD DESIGNER APPS

Instantly design feature-rich Excel-like spreadsheets with the SpreadJS Designers for desktop and web

POWERFUL PIVOT TABLE ADDON

Organize, extract and analyze large amounts of data quickly. Improve your business intelligence by visualizing complex data, discover trends, and uncover data information with multiple themes, familiar UI panels, and much more.

POWERFUL CALCULATION ENGINE INCLUDES 500+ FUNCTIONS

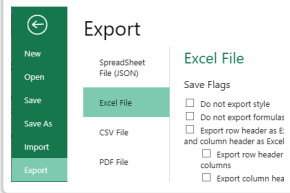

With more built-in functions than any other JavaScript spreadsheet (including custom functions and the formula text box) your computing power is optimized for big data, complex calculations, and advanced Excel models

EXTENSIVE CUSTOMIZED DESIGNER COMPONENT ADDON

Quickly provide an optimal and more localized Designer solution to your customers – offering them more Excel-like features and customizations

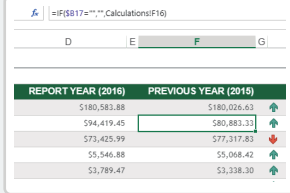

OPTIMIZE YOUR WEB APP SIZE AND SPEED IN ANY BROWSER

This modular client-side component works in Windows, Linux, Mac, Android, and iOS (as well as all modern browsers)

IMPORT/EXPORT EXCEL

Load the most complex Excel files in JavaScript, make changes, and export to an Excel file or save the data to a database.

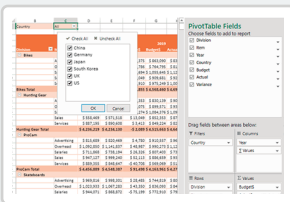

ADVANCED CALCULATIONS

Supports 500+ built-in functions, custom functions, array functions, dynamic arrays, formula textbox, localized language function names, most Excel functions, and more.

CHARTS & SPARKLINES

Support for 11 chart groups, 30+ chart types, trendlines, and combo charts. Set chart layouts, customize elements, and combine chart types.

PIVOT TABLES

An optional deployment add-on that is a powerful data analysis tool used to group, calculate, summarize, and present large amounts of data.

OPERATING BUDGET			
	BUDGET	ACTUAL	DIFFERENCE (\$)
Advertising	\$100.00	\$100.00	\$0.00
Debits	\$125.00	\$150.00	-\$25.00
Benefits	\$100.00	\$100.00	\$0.00
Supplies	\$100.00	\$90.00	\$10.00
Postage	\$150.00	\$145.00	\$5.00
Taxes or mortgage	\$500.00	\$490.00	\$10.00
Salaries expenses	\$500.00	\$500.00	\$0.00
Taxes	\$350.00	\$375.00	-\$25.00
Utilities	\$400.00	\$370.00	\$30.00
Other	\$500.00	\$455.00	\$45.00
Total Expenses	\$3,825.00	\$3,840.00	-\$15.00

CONDITIONAL FORMATTING

Use conditional formatting to automatically highlight important information or easily spot trends in your data using the values you specify.

Account Name:	Division 1 Southwest Region
Account Number:	00205014
Aging Date:	7/31/2017

Customer	Total Outstanding	Current	Aged 1
Alan Huang	\$1,712.00	\$856	
Alexandro Savely	\$1,902.00	\$951	
Andrew Allen	\$3,242.00	\$2,432	
Anna Andreoli	\$1,776.00	\$888	
Anthony Garverick	\$2,850.00	\$1,425	
Anthony Jacobs	\$854.00	\$427	
Bernjamin Patterson	\$2,614.00	\$1,307	
Bryan Mills	\$7,822.00	\$3,911	
Cathy Prescott	\$7,874.00	\$3,937	
Christine Phan	\$4,904.00	\$2,452	
Christopher Conant	\$3,956.00	\$1,978	

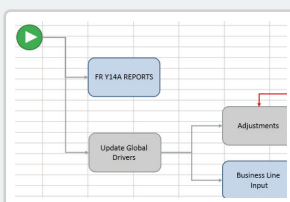

TABLES

Easier to manage and analyze spreadsheet data. Supports AutoExpand, conditional formatting, data validation, context menus, table resize and navigation, and more.

SalesPers	Birth	Region	SaleAmt	CompPct
Joe	Sort Ascending	260	0	
Robert	Sort Descending	660	0	
Michael	Sort By Color	940	0	
Erich	Clear Filter from "Region"	410	0	
Dafna	Filter By Color	800	0	
Rob	Text Filters	900	0	
Jonasor	Search	300	0	
Enania	Check all	310	0	
Dania	Uncheck all	500	0	

FILTERING

The Excel-like filter dialog allows users to automatically filter their data or take advantage of creating custom filters to show and hide the relevant data.

SHAPES

Includes support for many Excel shapes and provides advanced functionality using data-driven shapes to dynamically generate the shape to create interactive shapes.

1	Example
2	Married filing jointly (even if only one had income)
3	Married filing separately. Enter spouse's SSN above and full name here.
4	Check only one box.
5	☐ If someone can claim you as a dependent
6	☐ If you are a dependent
7	☐ If you are a dependent
8	☐ If you are a dependent
9	☐ If you are a dependent
10	☐ If you are a dependent
11	☐ If you are a dependent
12	☐ If you are a dependent
13	☐ If you are a dependent
14	☐ If you are a dependent
15	☐ If you are a dependent
16	☐ If you are a dependent
17	☐ If you are a dependent
18	☐ If you are a dependent
19	☐ If you are a dependent
20	☐ If you are a dependent

CELL TYPES

Define the type of information that can be entered and displayed in any cell or use predefined dropdowns to make it easier for your users to select and enter valid data.

Name	Category	Price	Shopping Place
Apple	Fruit	\$1.50	Grocery Store
Potato	Vegetable	\$2.00	Other
Tomato	Vegetable	\$3.21	Other
Sandwich	Food	\$2.00	Grocery Store
Hamburger	Food	\$2.00	Grocery Store
Grape	Fruit	\$4.00	Grocery Store

DATA VALIDATION

Define restrictions on data that can or cannot be entered within a cell. Provide visual indicators on invalid data to help correct the data to fit restrictions of a database.

METRIC 4	\$12.10	\$12.21
METRIC 5	\$0.75	\$0.79
METRIC 6	\$0.23	\$0.25
METRIC 7		
METRIC 8		
METRIC 9		

DRAW FILLING

Make it easy to enter data by using AutoFill. Use custom fill to load the data at runtime programmatically.

Names	City	Day	Total
Cindy	C1 089 468.30	C1 094 682.30	
Willy	C1 076 758.30	C1 094 682.30	
Sara	C1 094 684.30	C1 016 856.30	
John	C1 094 685.30	C1 094 685.30	
Holly	C1 013 685.30	C1 094 685.30	
Ken	C1 013 686.30	C1 074 851.30	
Hevvel	C1 034 686.30	C1 094 685.30	

GLOBALIZATION

Built-in support for English, Chinese, and Japanese, and create custom resource files for other languages. The calculation engine also includes 18+ language packages.
