- VSCode Designer Extension

^e = Wijmo Enterprise features

ACCELERATE YOUR ENTERPRISE VALUE AND PERFORMANCE

Wijmo controls are optimized for speed and flexibility. Enjoy all the key features you need out of the box and the flexibility to customize components.

CONFIGURE COMPONENTS CODE-FREE IN THE WIJMO DESIGNERS

Experiment with Wijmo components in the easy web-based and VSCode designers!

Select from 20+ components you'd like to configure, explore all the built-in options available, and easily add the code to your Wijmo apps.

FLEXIBLE, EXTENSIBLE API

Our easy-to-read, flexible API has a low learning curve, and components have a simple core with as many extensibility points as possible.

FAMILIAR, ACCESSIBLE, TOUCH-FIRST UI

Charts, grids, and other components are designed to be mobile-first and adhere to ARIA standards, with familiar features and UI, including Excel-like filtering, sorting, and merging.

FLEXGRID IS THE CHOICE FOR JAVASCRIPT DEVELOPERS AND ENTERPRISES

Mission-critical Fortune 500 companies use Wijmo because of its dependability and a commitment to providing the highest quality and feature-rich offerings. Wijmo has a 4.8/5 customer rating for quality, functionality, performance, customer service, and value.

COMPONENTS WRITTEN IN TYPESCRIPT

With TypeScript, you'll get an object-oriented C# feel, design-time error checking, complete IntelliSense in Visual Studio, and the true JavaScript components are written to the ECMAScript 6 standard.
